Utah Department of Environmental Quality
Division of Radiation Control
Room 212, Airport East Business Building (Bldg #2)
168 North 1950 West.
Salt Lake City, Utah 84114-4850

To Whom it may concern;

"As a citizen of Utah, I firmly believe that our state should work to protect future generations from radiological exposure and contamination. I therefore stand behind and support the Board's course of action to devise a new rule to ensure that no depleted uranium comes to our state in advance of the completion of thorough public health studies and performance assessments. A new rule should also take into account when levels of peak dosage occur as well as likely geological processes such as flooding and erosion."

Sincerely, *Paulette*
