Subject: License No: UT2300249; RML #UT 2300249 –Appendix A of Condition
35 Compliance Report; Neptune’s Modeling Report - Version 1.2

Dear Mr. Gabert:

As was reported on March 31, 2014 with our responses to the Division’s Round 1 Interrogatories (CD14-0084), EnergySolutions has revised the initial design of its Federal Cell to include an evapotranspirative cover equivalent to that currently under review for the Class A West Embankment. As a result, EnergySolutions is re-submitting Appendix A of its Condition 35 Compliance Report (which now considers the impacts of the evapotranspirative cover in version 1.2 of the depleted uranium Performance Assessment GoldSim model), accordingly.

When submitting responses to the Division’s Round 2 Interrogatories, EnergySolutions will provide the Division with a complete, self-contained Report with final GoldSim model (version 1.2), responses to Preliminary Completeness Review, and responses to the Division’s Round 1 Interrogatories (scheduled for delivery by June 16, 2014).

Please contact me or Sean McCandless at 801-649-2000 if there are any comments or questions regarding this submittal.

Sincerely,

Vern C. Rogers
Environmental Manager
