PUBLIC NOTICE OF DRAFT TMDL WATER QUALITY STUDY

The Division of Water Quality presents for public comment the draft Total Maximum Daily Load (TMDL) Water Quality Study for Rockport and Echo Reservoirs in Summit County, Utah. These waterbodies have been identified as being impaired by low dissolved oxygen. This impairment affects the water's beneficial use for aquatic wildlife. The purpose of the study is to identify the causes and sources of beneficial use impairment and set appropriate goals for meeting water quality standards. The TMDL study is available for public comment through December 20, 2013. The study is posted at the following web address:
<http://www.waterquality.utah.gov/PublicNotices/index.htm#tmdls>

There will be a public open house held December 12 from 4:00 to 6:00 p.m. at 10 North Main Street in Coalville, Utah. The meeting will highlight the findings of the study, allow for questions, and seek input on developing an implementation plan. For additional information contact Kari Lundeen at 801-536-4335 or klundeen@utah.gov.

Comments must be submitted by December 20th in writing to:
Carl Adams
