# Utah Division of Air Quality
## New Source Review Section
### Form 11
Internal Combustion Engines

- **Company**: 
- **Site/Source**: 
- **Date**: 

## Equipment Information

1. **Manufacturer**: __________________________
   - **Model no.**: __________________________
   - **The date the engine was constructed or reconstructed**: 

2. **Operating time of Emission Source**: 
   - **average**: 
     - **Hours/day**: 
     - **Days/week**: 
     - **Weeks/year**: 
   - **maximum**: 
     - **Hours/day**: 
     - **Days/week**: 
     - **Weeks/year**: 

3. **Manufacturer's rated output at baseload, ISO**: 
   - **hp or Kw**: 
   - **Proposed site operating range**: 

## Gas Firing

4. **Are you operating site equipment on pipeline quality natural gas**: □ Yes □ No

5. **Are you on an interruptible gas supply**: □ Yes □ No
   - If "yes", specify alternate fuel: 

6. **Annual consumption of fuel**:  
   - **MMSCF/Year**: 

7. **Maximum firing rate**:  
   - **BTU/hr**: 

8. **Average firing rate**:  
   - **BTU/hr**: 

## Oil Firing

9. **Type of oil**: 
   - **Grade number**: □ 1 □ 2 □ 4 □ 5 □ 6 □ Other specify ____________

10. **Annual consumption**:  
    - **gallons**: 

11. **Heat content**:  
    - **BTU/lb or BTU/gal**: 

12. **Sulfur content**:  
    - **% by weight**: 

13. **Ash content**:  
    - **% by weight**: 

14. **Average firing rate**:  
    - **gal/hr**: 

15. **Maximum firing rate**:  
    - **gal/hr**: 

16. **Direction of firing**: □ horizontal □ tangential □ other: (specify)
### Operation

<table>
<thead>
<tr>

</table>

<table>
<thead>
<tr>
<th>19. Manufacturer's Emissions in grams per hour (gr/hp-hr): _______ NOx _______ CO _______ VOC</th>
</tr>
</thead>
<tbody>
<tr>
<td>_______ Formaldehyde</td>
</tr>
</tbody>
</table>

| 20. Attach manufacturer's information showing emissions of NOx, CO, VOC, SOx, CH2O, PM10, PM2.5, CO2, CH4 and N2O for each proposed fuel at engine loads and site ambient temperatures representative of the range of proposed operation. The information must be sufficient to determine maximum hourly and annual emission rates. Annual emissions may be based on a conservatively low approximation of site annual average temperature. Provide emissions in pounds per hour and except for PM10 and PM2.5 parts per million by volume (ppmv) at actual conditions and corrected to dry, 15% oxygen conditions.  |

### Method of Emission Control:

<table>
<thead>
<tr>
<th>□ Lean premix combustors</th>
<th>□ Oxidation catalyst</th>
<th>□ Water injection</th>
<th>□ Other (specify)__________</th>
</tr>
</thead>
<tbody>
<tr>

INSTRUCTIONS – Form 11 Internal Combustion Engine

NOTE: 1. **Submit this form in conjunction with Form 1 and Form 2.**

2. Call the Division of Air Quality (DAQ) at (801) 536-4000 if you have problems or questions in filling out this form. Ask to speak with a New Source Review engineer. We will be glad to help!

1. Indicate the manufacturer, the model number and the date the engine was constructed or reconstructed.
2. Complete the fuel burning equipment's average and maximum operating schedule in hours per day, days per week, and weeks per year.
3. Specify the manufacturer's rated output and heat rate at baseload corresponding to International Standard Organization (ISO) conditions in megawatts (MW) or horsepower (hp). Also indicate what the proposed site operating range is in megawatts or horsepower.
4. Indicate the origin of the gas used in the engine.
5. Indicate if the gas supply can be interrupted and what the backup fuel is in case this happens.
6. Specify what the annual consumption of fuel is in million standard cubic feet (MMscf).
7. Supply the maximum firing rate in BTU/hr.
8. Supply the average firing rate in BTU/hr.
9. Indicate the grade of oil being used.
10. Supply the annual consumption calculated in gallons of oil.
11. Indicate the heat content of the oil in BTU/lb or BTU/gal.
12. Indicate the sulfur content of the oil in percent by weight.
13. Indicate the ash content of the oil.
14. Supply the average firing rate of oil.
15. Supply the maximum firing rate of oil.
16. Indicate what the firing direction is.
17. Indicate what the engine will be used for.
18. Indicate what type of cycle the engine will have.
19. Indicate the manufacturer's emissions rate in grams/hp-hr.
20. Provide manufacturer's emission information for the engine. Also indicate what method of emission control to be used.
21. Provide details of the operation of emission controls and exhaust parameter information.
Review of applications and issuance of permits will be expedited by supplying all necessary information requested on this form.

GROUND ELEVATION OF FACILITY ABOVE MEAN SEA LEVEL _______________ feet.

UTAH AIR CONSERVATION BOARD STANDARD CONDITIONS ARE 68°F AND 14.7 PSIA.

General Instructions for this form.
1. Identify each emission; point with a unique number for this plant site on plot plan, previous permits and emission inventory questionnaire. Limit emission point number to 8 character spaces. For each emission point use as many lines as necessary to list air contaminant data. Typical emission point names are: heater, vent, boiler, tank, reactor, separator, baghouse, fugitive, etc. Abbreviations are OK.
2. Typical component names are: air, H₂O, nitrogen, oxygen, CO₂, CO, NOₓ, SOₓ, hexane, particulate matter (PM₁₀ and PM₂.5), etc. Abbreviations are OK.
3. Concentration data is required for all gaseous components. Show concentration in volume percent of total gas stream.
4. Pounds per hour (#/hr) is maximum emission rate expected by applicant.
5. Tons per year (T/Y) is annual maximum emission rate expected by applicant, which takes into account process operating schedule.
6. As a minimum applicant must furnish a facility plot plan drawn to scale showing a plant benchmark, latitude and longitude correct to the nearest second for the benchmark, and all emission points dimensioned with respect to the benchmark. Please show emission point UTM coordinates if known.
7. Supply additional information as follows if appropriate:
   (a) Stack exit configuration other than a round vertical stack. Show length and width for a rectangular stack. Indicate if horizontal discharge with a note.
   (b) Stack's height above supporting or adjacent structures if structure is within three “stack heights above ground” of stack.
